INTRODUCTION

Before the author describes the problems related to factors that show humans alive connected with the human has 6 duplicates exactly as the original, first author of seeking forgiveness from God.

The factors, that illustrates the human has 6 duplicates exactly as the original taken from the verses:

1. ***"And (remember) when Ibrahim said:" My Lord, show me how You give life to the dead. "He said:" Not confident are you? "Ibrahim replied:" I have been assured, however, that my heart remained steady (with my faith) Allah says: "(If so) take four birds, then chopped it all by you. (Allah said):" then put on each of the hill one part of the parts, then call them, they would come to you immediately. "And know that Allah is Mighty, Wise" (Al-Baqarah 2: 260)***
2. ***"And say not of those who are slain in the way of Allah, (that they are) dead even (in fact) they are alive, but you are not aware of it" (Al-Baqarah 2: 154)***

Through this M particle which have speed 18,262,500 times faster than speed of light absorbs quanta of energy or quanta of dark energy ($10^{-29}\text{g}/\text{cm}^3$), to make scanning to save new information about our bodies and entire our universe and to copy these information in the form of mass in our six symmetrical universes every 0.5 nanoseconds.

HYPOTHESIS

The author proposes the hypothesis, there are factors that indicate human remains alive associated with the presence of human has 6 duplicates exactly as the original.

THE COPY PROCESS IS CARRIED OUT IN THE SIX SYMMETRICAL UNIVERSES

"And say not of those who are slain in the way of Allah, (that they are) dead even (in fact) they are alive, but you are not aware of it" (Al-Baqarah 2: 154)

Let's dig deeper into the secret behind the verse ***"... those who are slain in the way of Allah, (that they are) dead even (in fact) they were alive ..."*** (Al-Baqarah 2: 154) above, it was described to us the copy process in the six symmetrical universes. Seen by our eyes, the human body does not exist anymore because buried in the soil, but the fact that human beings alive.

Here the author show that trillion, trillion, trillion, trillion, trillion, trillion and trillion m particles which have speed 18,262,500 times faster than speed of light absorbs quanta of energy or quanta of dark energy ($10^{-29}\text{g}/\text{cm}^3$), to make scanning to save new information about our bodies and entire our universe and to copy these information in the form of mass in our six symmetrical universes every 0.5 nanoseconds. This mechanism of how the copy process is carried out in the six symmetrical universes that is really astonishing and incredible than we ever could have imagined in our lives. We are still strong believes that humankind in entire our universe is unique but in reality it is just an illusion. Out there in our six symmetrical universes we have 6 duplicates of our bodies exactly the same as the original. Due to the mechanism of the copy process is carried out in the six symmetrical universes that help us to get a new knowledge that it is possible the tiny dark energy has relation with information about our universe. We understand that quanta of energy ($10^{-29}\text{g}/\text{cm}^3$) or quanta of dark energy is equal to quanta of mass $3 \cdot 10^{-61}\text{g}$ times square the speed of m particle. In other words, the dark energy is the mass of the information about entire our universe including the mass of the information about our physiologically, psychologically, historically and physically.

M particle absorbs quanta of dark energy $10^{-29}\text{g}/\text{cm}^3$ in entire our universe

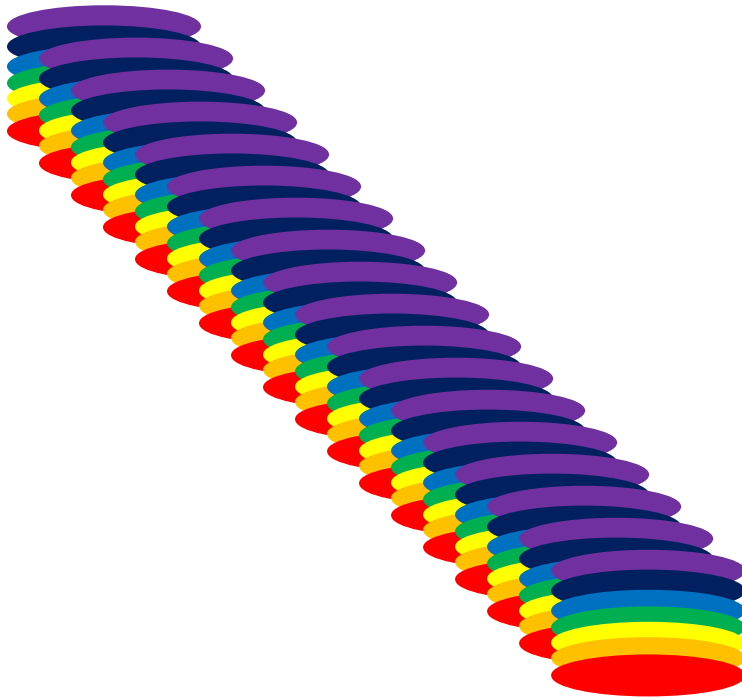

Figure 1: Quanta of energy or quanta of dark energy $10^{-29}\text{g}/\text{cm}^3$ absorbs by m particle and carry quanta of mass $3, \text{e}-61 \text{ g}$ at $5\,474\,959\,764\,225\,000 \text{ m/second}$.

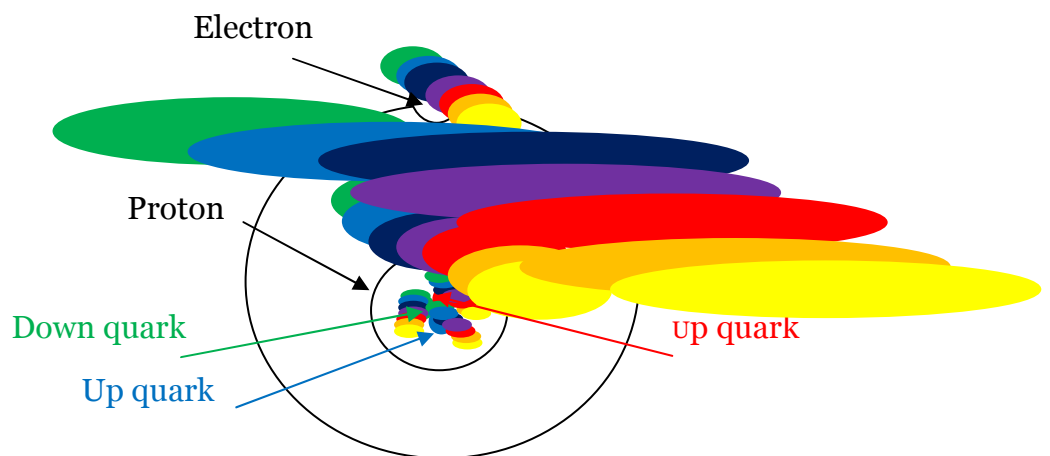

Figure 2: The Hydrogen atom and 6 duplicates of its atom. Its atoms have 1 proton and 6 duplicates of its proton, 1 electron and 6 duplicates of its electron in the six symmetrical universes. Each of the quarks has 6 duplicates in the six symmetrical universes.

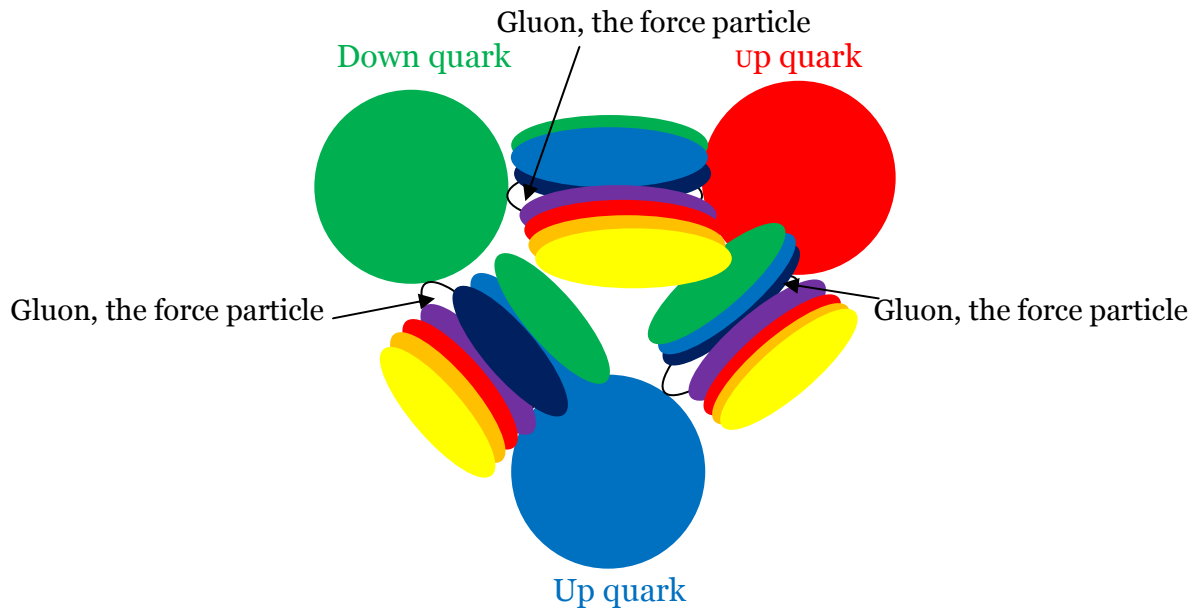

Figure 3: The Quarks within proton and the Gluons (the force-carrier particles) binds the quarks. Each of the Gluons has 6 duplicates in the six symmetrical universes.

Figure 4: A human hair, which is about 25 micrometers thick has 6 duplicates exactly as the original in the six symmetrical universes.

Figure 5: We have 6 duplicates of our bodies exactly the same as the original in the six symmetrical universes.

Figure 6: The animal has 6 duplicates of his bodies exactly the same as the original in the six symmetrical universes.

Our six symmetrical universes exist, surround us and all these universes are invisible

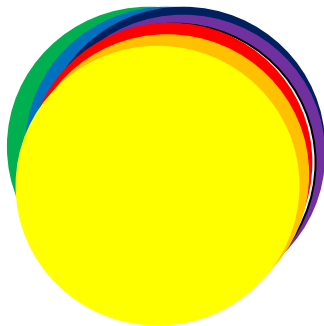

Figure 7: Earth, where we live for millions of years has 6 duplicates exactly as the original in the six symmetrical universes.

Our six symmetrical universes exist and does surround us is really astonishing than we ever could have imagined in our lives. Symmetry universe, Super symmetry universe, Super-super symmetry universe, Super-super-super symmetry universe, Super-super-super-super symmetry universe and Super-super-super-super-super symmetry universe are transparent and that means that all these universes are invisible. It is only our universe that is non-transparent. In these invisible universes there contain dark matter, where light cannot penetrate the dark matter but the light is bent when it is in contact with the dark matter. This dark matter composed of particles smaller than electrons, mass $8, e^{-58}g$, and moving 365,250 times faster than the speed of light (As-Sajda: 32: 5) and also not interact with ordinary matter. In our six symmetrical universes we have 6 duplicates of entire our universe including our bodies exactly the same as the original.

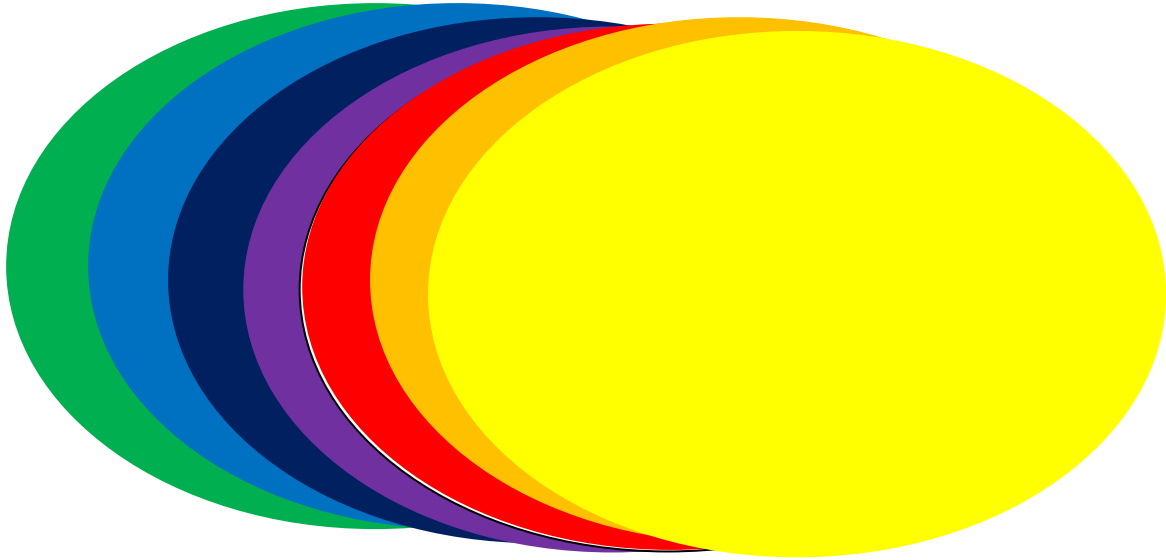

Figure 8: Entire our universe where the moon, stars, suns, planets, galaxies, galaxy clusters, super galaxy clusters, nebulae, atoms, people, animals, vegetation and all life have their places has 6 duplicates exactly as the original in the six symmetrical universes.

DUPLICATE OF THE HUMAN BODY, EXACTLY THE SAME AS THE ORIGINAL THAT APPEARED

"And (remember) when Ibrahim said: "My Lord, show me how You give life to the dead. "He said: "Not confident are you? "Ibrahim replied: "I have been assured, however, that my heart remained steady (with my faith) Allah says: "(If so) take four birds, then chopped it all by you. (Allah said):" then put on each of the hill one part of the parts, then call them, they would come to you immediately. "And know that Allah is Mighty, Wise" (Al-Baqarah 2: 260)

If we trace up into, what is behind the verse ***"... Allah says: "(If so) take four birds, then chopped it all by you. (Allah said):" then put on each of the hill one part of the parts, then call them, they would come to you immediately. "And know that Allah is Mighty, Wise" (Al-Baqarah 2: 260)***

According to the author of four birds were chopped and placed above each of the hill was indeed dead. The body of the birds become rotten, and there have been a process of decay or decomposition process through the help of living organisms such as fungi, bacteria, grubs and ants. In this decay process, carbon atoms and oxygen atoms to form carbon dioxide. Then carbon dioxide is absorbed by plants and changed into oxygen and glucose through the process of photosynthesis with the help of sunlight, water and chloroplasts. Chloroplasts found in green plant parts. Where glucose is used as food by plants, while the oxygen is used for groceries through the process of respiration by humans and animals.

Also the body of the birds become rotten and form ammonia gas. Furthermore, ammonia is changed into nitrite by bacteria nitrosoma. Then nitrite is converted into nitrate by bacteria nitrobaktor. Finally nitrate through denitrification process back into nitrogen and rises into the atmosphere. So the carbon, nitrogen, oxygen and hydrogen that become building material bodies of dead birds are back out and gathered around the hill and there are rising up into the atmosphere. Furthermore, the atoms will be used again to become the raw material of humans, animals and other living organisms are new.

Now the birds that appear, and come to Prophet Abraham are duplicates of the birds, which are the same as the original. Where the duplicate bird, living in the six symmetrical universes.

This is the secret behind the verse of Al Baqarah 2: 154 above that humans and other living organisms do not die **"... even (in fact) they are alive, but you are not aware of it" (Al-Baqarah 2: 154)**

So indeed, humans and other living organisms are not dead, but alive. Or in other words, human beings and other living organisms have six duplicates as the original in the six symmetrical universes.

CONCLUSION

Seen by our eyes, the human body does not exist anymore because buried in the soil, but the fact that human beings alive.

Here the author show that trillion, trillion, trillion, trillion, trillion, trillion and trillion m particles which have speed 18,262,500 times faster than speed of light absorbs quanta of energy or quanta of dark energy ($10^{-29}\text{g}/\text{cm}^3$), to make scanning to save new information about our bodies and entire our universe and to copy these information in the form of mass in our six symmetrical universes every 0.5 nanoseconds. This mechanism of how the copy process is carried out in the six symmetrical universes that is really astonishing and incredible than we ever could have imagined in our lives. We are still strong believes that humankind in entire our universe is unique but in reality it is just an illusion. Out there in our six symmetrical universes we have 6 duplicates of our bodies exactly the same as the original. Due to the mechanism of the copy process is carried out in the six symmetrical universes that help us to get a new knowledge that it is possible the tiny dark energy has relation with information about our universe. We understand that quanta of energy ($10^{-29}\text{g}/\text{cm}^3$) or quanta of dark energy is equal to quanta of mass $3 \cdot 10^{-61}\text{g}$ times square the speed of m particle. In other words, the dark energy is the mass of the information about entire our universe including the mass of the information about our physiologically, psychologically, historically and physically.

Four birds were chopped and placed above each of the hill was indeed dead. The body of the birds become rotten, and there have been a process of decay or decomposition process through the help of living organisms such as fungi, bacteria, grubs and ants. In this decay process, carbon atoms and oxygen atoms to form carbon dioxide. Then carbon dioxide is absorbed by plants and changed into oxygen and glucose through the process of photosynthesis with the help of sunlight, water and chloroplasts. Chloroplasts found in green plant parts. Where glucose is used as food by plants, while the oxygen is used for groceries through the process of respiration by humans and animals.

Also the body of the birds become rotten and form ammonia gas. Furthermore, ammonia is changed into nitrite by bacteria nitrosoma. Then nitrite is converted into nitrate by bacteria nitrobaktor. Finally nitrate through denitrification process back into nitrogen and rises into the atmosphere. So the carbon, nitrogen, oxygen and hydrogen that become building material bodies of dead birds are back out and gathered around the hill and there are rising up into the atmosphere. Furthermore, the atoms will be used again to become the raw material of humans, animals and other living organisms are new.

Now the birds that appear, and come to Prophet Abraham are duplicates of the birds, which are the same as the original. Where the duplicate bird, living in the six symmetrical universes.
