INTRODUCTION

On this occasion the author will explain about the problems concerning the existence of God, elementary particles and space, based on Moses saw God. Before the author further write this problem first the author of seeking forgiveness from God.

In an effort to illustrate the existence of God based on the existence of elementary particles and the space is taken from the verses:

1. *"And when Moses got to (where) the fire, he was called from (direction) on the right side of the valley in a blessed place, a tree of wood, namely:" O Moses, indeed I am Allah, Lord of the Worlds" (Al-Qasas: 28:30)*
2. *"And when Moses came at the appointed time and the Lord has spoken (directly) to him, Moses said:" My Lord, reveal (self Thou) to me so I can look at you. "God said: "You never could see me, but look to the hills, so if it stays in place you would have been able to see me." When God appeared to the mountain, the mountain was crumbled into dust and Moses fell unconscious. So after he recovered his senses, he said: "Glory to Thee, I repent to You and I am the first of the believers." (Al A'raf: 7:143)*
3. *"So when I have perfected it and I blew him my spirit; then you shall bow down to prostrate to him" (Shaad: 38:72)*
4. *"And they ask you about the spirit. Say: "The Spirit is the affair of my Lord, and you have not given knowledge but a little." (Al-Israa ': 17:85)*
5. *"And indeed We created man and know what prompted by his heart, and We are nearer to him than his neck vein," (Qaf: 50:16)*

The existence of God is connected with elementary particles and this space based on when Moses saw God.

HYPOTHESIS

For this purpose the author makes the hypothesis whether God exists, if we find the elementary particles and the space around us?

GOD SPOKE TO HUMAN USE HUMAN STANDARDS

"... O Moses, indeed I am Allah, Lord of the Worlds" (Al-Qasas: 28:30)

Now let's open behind the verses of Al Qasas: 28:30 above, where God spoke directly to Moses and declare that God is the Lord of the Worlds. Apparently, here we know in fact that God is like a man who can speak directly with other human beings, which in this case God who delivered the declaration through sound vibrations with a certain frequency that can be understood by Moses. If God speaks to use the standards of God, Moses would not understand and did not understand what was spoken by the Lord. Therefore here God used human standards if God want to deliver the news to the people, in this case with news and commands to Moses.

TO SEE GOD THROUGH TRACES OF GOD IN GOD PARTICLE

"... Moses said: " My Lord, reveal (self Thou) to me so I can look at you. "God said: "You never could see me, but look to the hills, so if it stays in place you would have been able to see me." When God appeared to the mountain, the mountain was crumbled into dust and Moses fell unconscious..." (Al A'raf: 7:143)

Furthermore, if we explore deeper into what is behind the veil verse Al A'raf: 7: 143 above, it opens that if we want to see God, we must look to the traces of God in the form of the God particle. One of God's particles the author called quark. Where quark is one of the traces of God that we can see and we can investigate.

If we dig deeper into what Moses saw in the form of a hill, in fact it is the arrangement of the particles of the Lord. Or in other words the quarks that are actually building hills seen by Moses.

To see God not by a direct view to the hills, but should look into the composition of the particles into the hillside building. For example, if we look at one of the hydrogen atoms into the hill building elements. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. So if the proton is split, then we will find two top quarks and one down quark. These three quarks combined with gluons.

Now we understand that behind the verse Al A'raf: 7: 143 Moses had seen the Lord not to look at the hills, but look at the elementary particles that become building dust scattered when the hill was splinters.

So by looking at and examining the traces of God in the form of elementary particles, we will find God. Or in other words to see and find God must go through the traces of God that formed the elementary particles.

SPIRIT OF GOD IS ELEMENTARY PARTICLE FORMED ATOM AND BEING COMPOSITION OF THE HUMAN BODY AND OTHER LIVING ORGANISMS

"So when I have perfected it and I blew him my spirit; then you shall bow down to prostrate to him" (Shaad: 38:72)
"... Say: "The Spirit is the affair of my Lord, and you have not given knowledge but a little." (Al-Israa ': 17:85)

Based on the verse "... and I blew him my spirit ..." (Sad: 38:72) above, we can get an idea that God has made elementary particles as building atoms in the human body include all living organisms such as archaea, bacteria, plants, amoeba, fungi and animals.

Although we do not know from the beginning how the elementary particles formed "...The Spirit is the affair of my Lord, and you have not given knowledge but a little." (Al-Israa ': 17:85). But we know how the elementary particles that develop their arrangement of atoms which become the building of the human body and other living organisms.

GOD IS IN THE HUMAN BODY

"... and We are nearer to him than his neck vein," (Qaf: 50:16)

Now let us examine more deeply about God's existence. Based on the verse Qaf: 50:16 above, we can understand that the human body is composed of elementary particles of God or in other words that there is God in the human body.

So the secret behind the verse Qaf: 50:16 illustrates that where there is human, there is God. God is everywhere.

CONCLUSION

Based on the description above we can conclude that God is like a man who can speak directly with other human beings, which in this case God who delivered the declaration through sound vibrations with a certain frequency that can be understood by Moses. If God speaks to use the standards of God, Moses would not understand and did not understand what was spoken by the Lord. Therefore here God used human standards if God want to deliver the news to the people, in this case with news and commands to Moses.

If we want to see God, we must look to the traces of God in the form of the God particle. One of God's particles the author called quark. Where quark is one of the traces of God that we can see and we can investigate. To see God not by a direct view to the hills, but should look into the composition of the particles into the hillside building. For example, if we look at one of the hydrogen atoms into the hill building elements. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. So if the proton is split, then we will find two top quarks and one down quark. These three quarks combined with gluons. So by looking at and examining the traces of God in the form of elementary particles, we will find God. Or in other words to see and find God must go through the traces of God that formed the elementary particles.

We can get an idea that God has made elementary particles as building atoms in the human body include all living organisms such as archaea, bacteria, plants, amoeba, fungi and animals.

Although we do not know from the beginning how the elementary particles formed. But we know how the elementary particles that develop their arrangement of atoms which become the building of the human body and other living organisms.

We can understand that the human body is composed of elementary particles of God or in other words that there is God in the human body. Where there is human, there is God. God is everywhere.
